

VISION 2020

My proposal
simplified from
the OECD model

- Trade & Infra –
 - Information systems
 - Commercial/Financial systems
- Social systems –
 - Political/Legal system
 - Cultural system
- Education/Spiritual systems –
 - Education/Innovation system

Public/Private

WHAT

HOW

Semper
Pro
Grediens

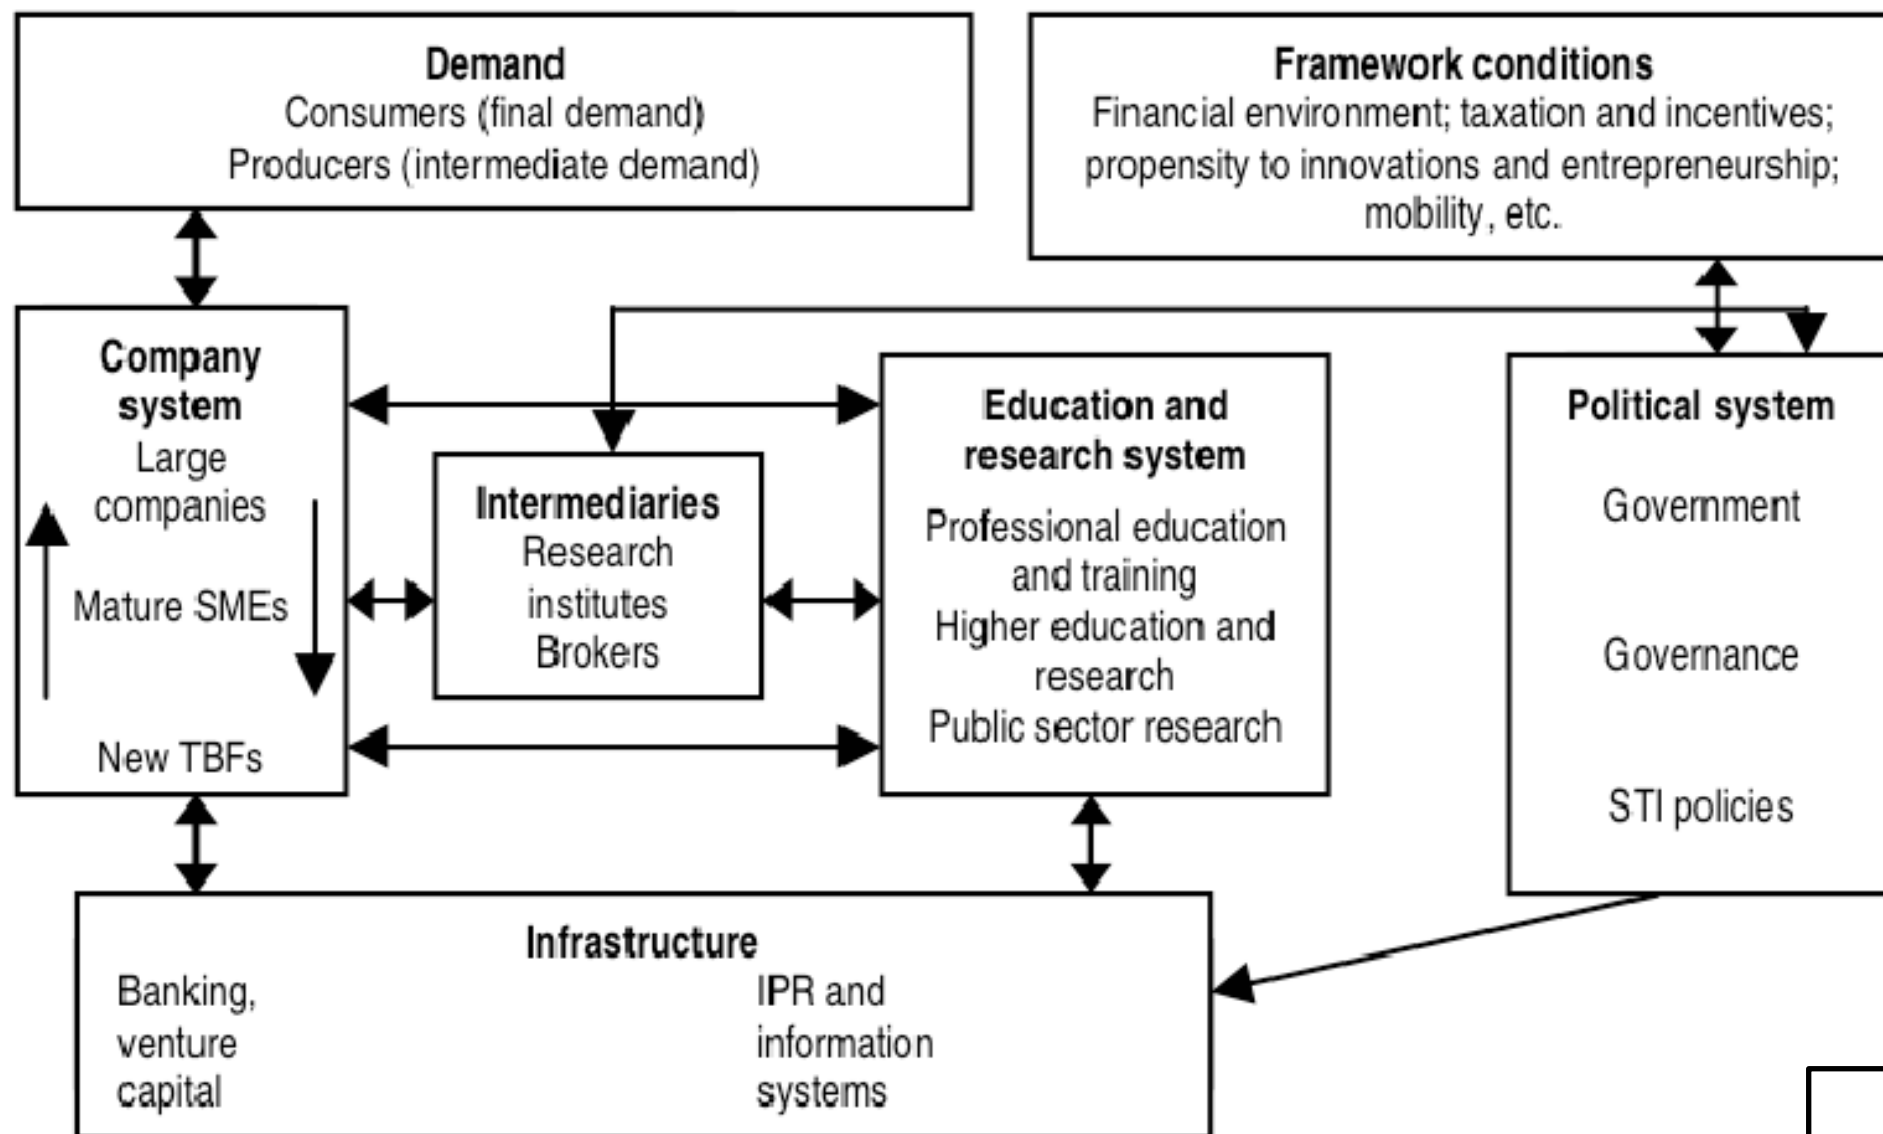

WHY

Education systems

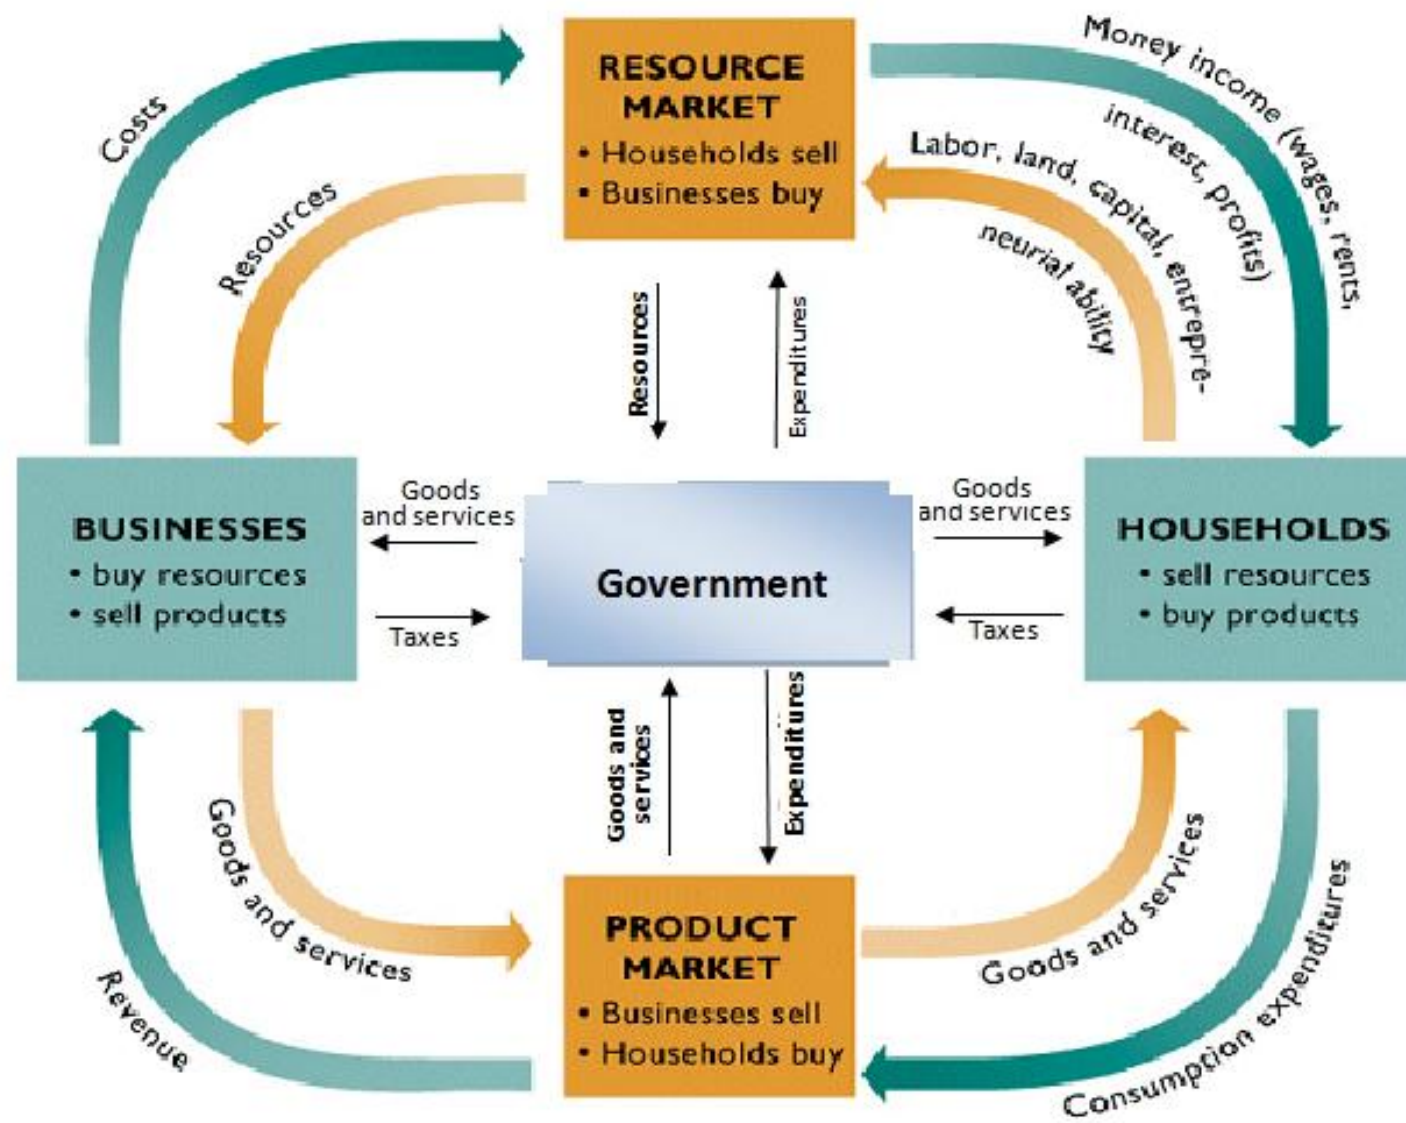

Public/Private

Public

SXM – Semper Pro Grediens
HT – L' Union Fait La Force

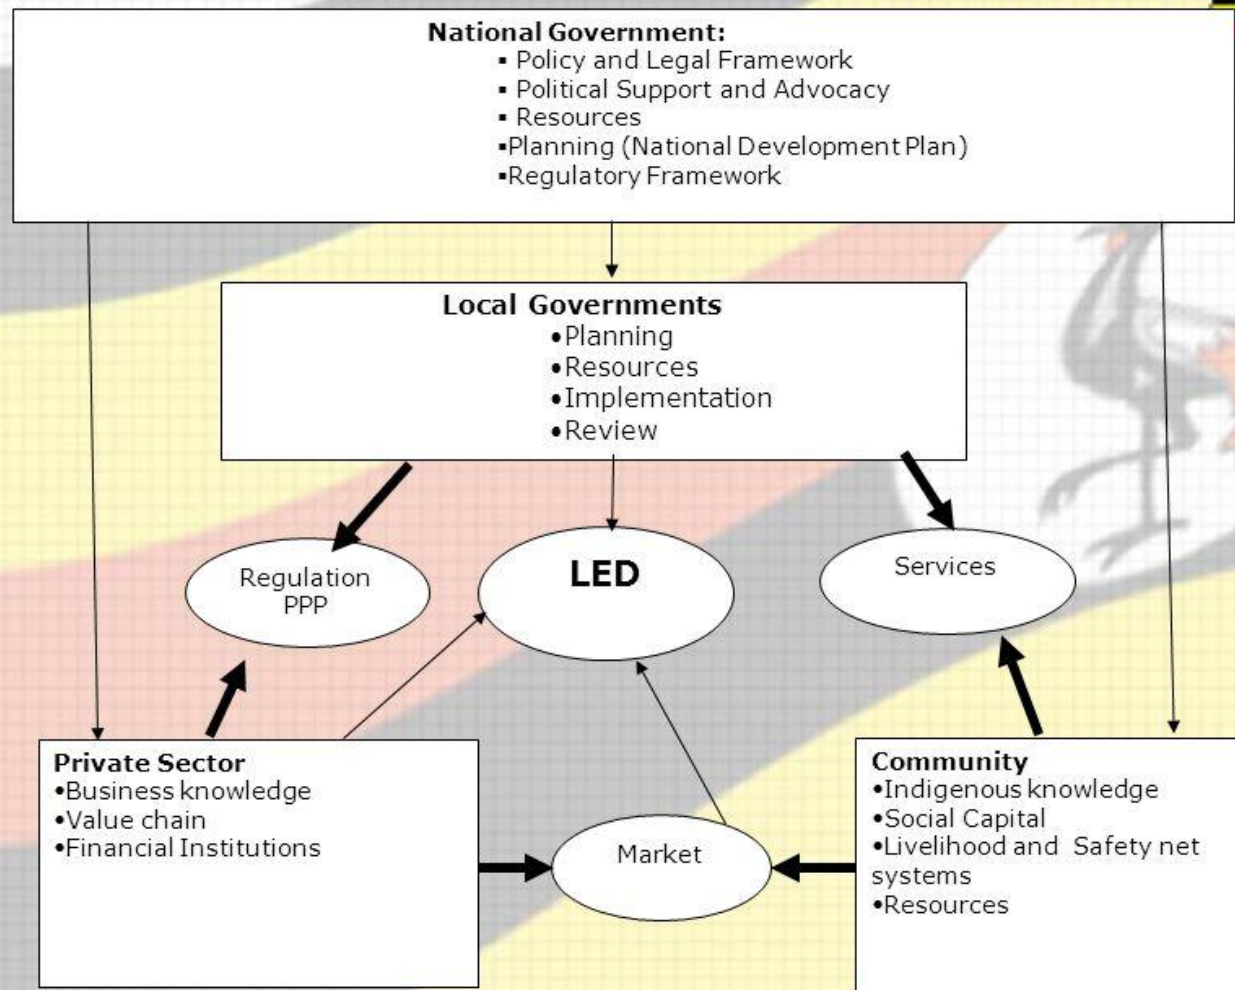

The OECD
Innovation
systems model

The Government must be stable and has an economic development plan

Local Economic Development Framework

Model by Mutabwire
2010

Economic development approach (example)

My contribution (Private sector service to Education systems)

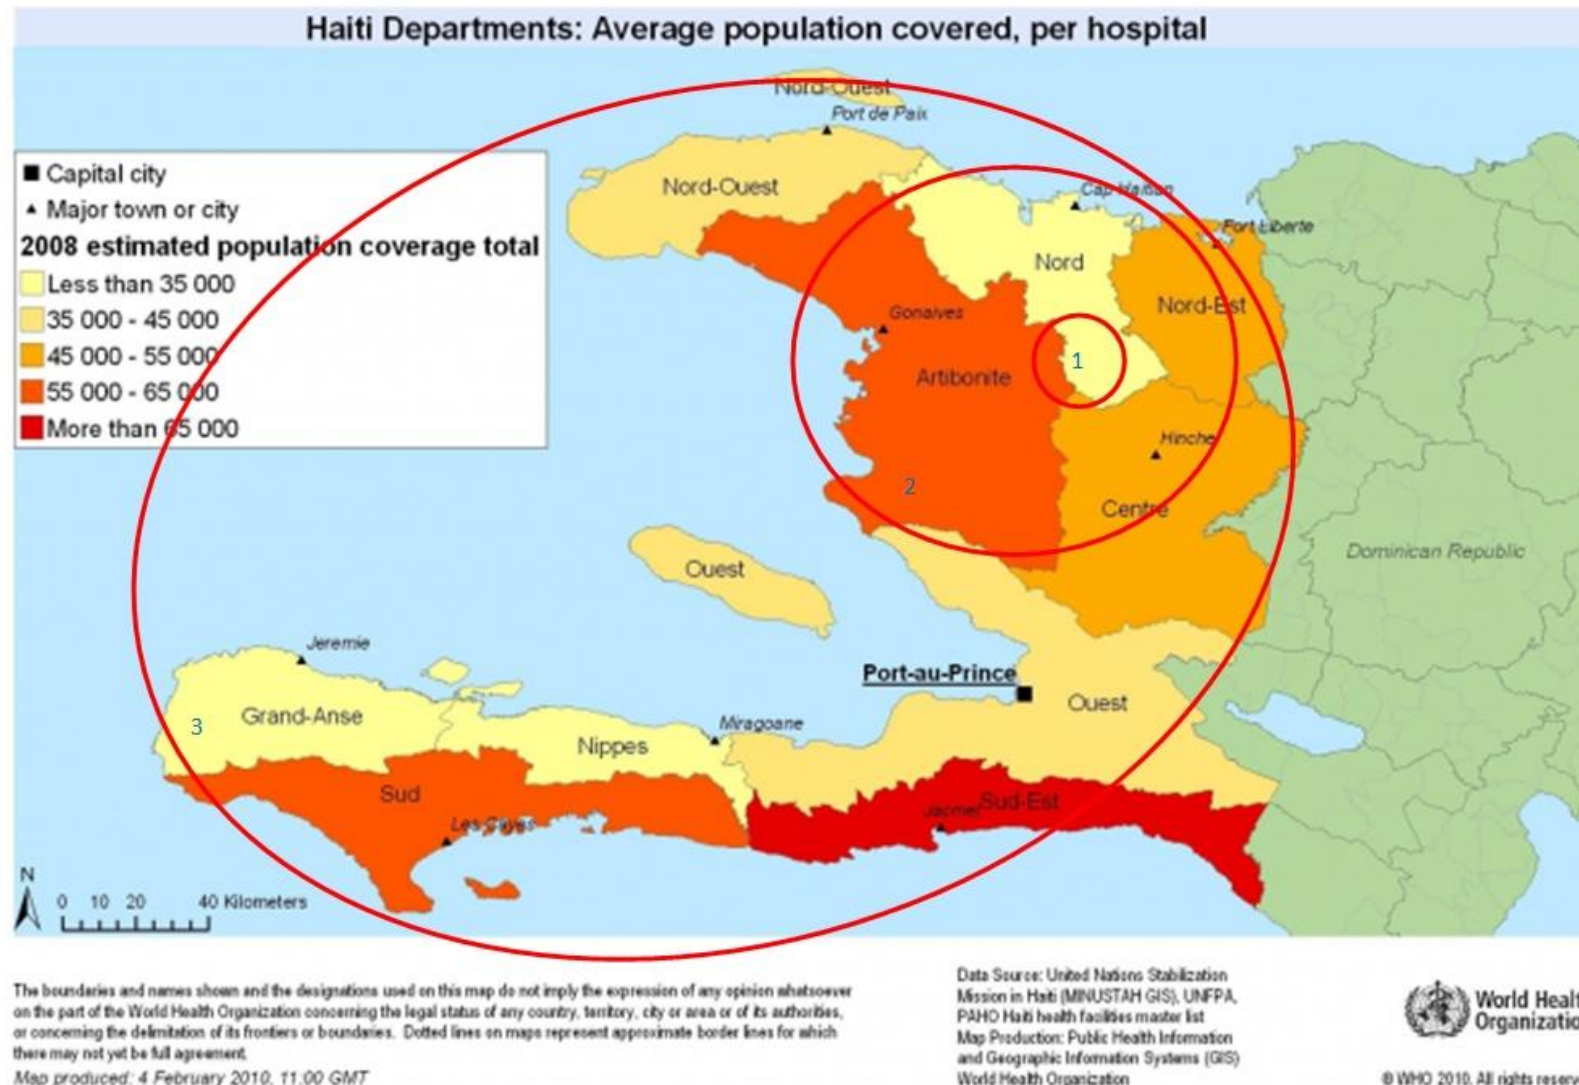

Market – (development through Education technology like [LinqOp](#))

Sustainable Development is the goal and is achieved through Innovation education

The proposal (approach) is applicable long-term in the Caribbean Community (CariCom) like in SXM, Haiti and others

1. Local
2. Region
3. National
4. Caribbean
5. Worldwide

The long-term vision is creating a strong community locally in NL, EU and/or globally (other countries) that is contributing in their own way in developing a better future for the youth in Haiti/Caribbean through very well defined economic development plans

Brainstorm in 2016 (Need to be updated)
